

New

2-Speed Rear Axle

Imaginative Manufacturing has developed the next great leap in the golf car industry. **2-speed rear axles** that give both speed and torque, (4-5) mph increase in high gear and half speed in low.

Imaginative Manufacturing Inc.

- **Club Car**
- **EZGO**
- **Yamaha**

These new rear axles feature high/low synchronized shifting (shift while you are moving), locking differential, rear lift blocks installed on the axle and the 4x4 output is all shaft drive. Yes, there is more. You now have the flexibility to determine how much you want to spend. This is because you can reuse the stock electrical system (motor, controller and wiring) and still get solid performance without spending a fortune on electrical component upgrades.

Gas 2 Speed coming soon

Two Speed Rear Axle: (High, 10:1/ Low, 20:1), Synchronized Shifting, Locking Differential

Rear Axles can be purchased Separately

2-Speed 4x4 Kit
